

Olya Androsik

PRODUCT DESIGN & RESEARCH LEADER

Valencia, Spain — remote across EU & US time zones · olgaandrosik@gmail.com · olyaandrosik.com ·
linkedin.com/in/olyaandrosik · English · Russian · conversational Spanish

PROFILE

Design and research leader with 15+ years across consumer commerce, mobile products, regulated healthcare, enterprise platforms and AI-enabled products. I lead the work from customer insight to product decisions, and build the teams, research practice and shared standards that carry it forward.

EXPERIENCE

UX Design Lab, LLC — Director of Design Operations & UX Strategy

2025 – Present

Remote from Valencia, Spain · consulting for design organizations

- DesignOps and UX strategy across product design, accessibility governance and AI-ready transformation.
- Research, testing and application of the Team Capability Engine methodology by Pavel (Designer of Thought) — capability diagnostics, mentorship pathways and evidence-based team development, delivered as a consulting service.

Brady UX — Co-Founder; Head of Product Design, DesignOps, Strategy & Ethical AI

2023 – 2025

Eight-plus AI-focused client engagements

- Built a practice around responsible AI product work: explainability, recovery paths and human accountability designed into the interaction model.
- Led product design for FIRST90, an AI-enhanced onboarding and micro-learning product. Reported improvement in 30-day engagement: 25%.
- Delivered visible progress and feedback systems with keyboard-accessible interaction.

Wayfair — Senior Manager, Product Design & Design Operations

2021 – 2023

Built the DesignOps Office serving a 160+ person design organization; led 15+ designers, managers and partners

- Built the function from zero: hiring, onboarding, education, research operations, tooling, governance and 40+ method and practice guides.
- Led the toolchain migration for 60 of 180 designers: 15% less time on design projects, 30% lower development effort, \$257K annual savings, 87% of designers reporting greater craft confidence.
- Internal B2B redesign reported 20% lower business expense and 15% greater service efficiency within a year.

Abbott Laboratories — Manager, Global Design Operations

2018 – 2021

Up to 22 designers across six time zones · consumer and enterprise users in regulated healthcare

- NAVICA COVID-19 testing platform: joined at the initial brief, led discovery with senior leadership, created the early MVP prototype used in concept-validation discussions, recruited the team and led an 18-month program across five connected products. Growth from 10K daily users two weeks after launch to 100K by Sprint 10.
- Service blueprints developed with CDC clinicians; clinical workflow observation informed authentication and task flows compatible with gloves and face shields.
- Stewarded a shared design system across 15 country sites, reducing design and development debt by 30%.
- Enterprise tooling subject-matter expert with Adobe XD's product team (2018–2019), shaping functionality for Abbott's enterprise rollout.
- OVA (2019): directed a five-week AI-assisted IVF support proof of concept with clinicians and data scientists.
- Abbott President's Award, presented by CEO Robert B. Ford.

Arrive — Senior Product Designer / Design Lead

Oct 2017 – Sep 2018

Led six UX resources · desktop, mobile web and native apps

- End-to-end redesign of the consumer parking experience, including the partner integrations that brought parking inventory into the booking journey.

The Home Depot — Senior UX Architect

2016 – 2018

Accounts, cart, checkout and Save for Later

- Owned the account, cart and checkout experience; led the one-page checkout design — reported +23% checkout conversion.
- Led design and integration of Save for Later — reported 15% revenue increase among customers using saved items in the first two weeks.
- Forbes (2017) cited Home Depot's simplified online checkout and a 20% reduction in checkout time.

One Technologies · JCPenney × Sephora · AT&T · CBRE — Product design & UX roles

2014 – 2016

- One Technologies: research, testing and redesign of iOS and Android consumer-credit products — reported +32% mobile engagement and +20% conversion.
- Sephora × JCPenney Beauty Insider integration: led customer interviews, comparative flow testing and interaction design. Compared flows moved sign-in/up interaction from 12% to 46% and sample engagement from 42% to 63%; the experience moved into checkout. Separate mobile rewards work reported 11% greater enrollment and 15.84% greater account linking.
- AT&T and CBRE: telecom and commercial real-estate product engagements.

CAPABILITIES

- Product design leadership; consumer commerce and mobile experiences
- User research, comparative testing and research operations
- Hiring, coaching, career frameworks and distributed team leadership
- Design systems, accessibility governance and UX metrics
- Responsible AI patterns, human-in-the-loop workflows, explainability
- Service design, discovery and complex B2B SaaS

EDUCATION & RECOGNITION

- MICA — BFA, Interactive Design and Art (Presidential Scholarship)
- IDEO U — Human-Centered Service Design
- Abbott President's Award, presented by CEO Robert B. Ford
- Speaker, ADVATERA — design leadership and design operations
- Auro Prism — independent research in progress on thoughtful AI, neuro-inclusive systems and human judgement
